- 6.6 Referendum for a Recommendation.** On questions relating to the substance of proposed changes or revisions in the standards relating to the MUTCD or other accepted national standards, the following principles and procedures shall be adhered to in generating a recommendation of the National Committee

Technological advances and experimentation from time to time reveal the desirability for changes in the design, location, and operation of traffic control devices, and the knowledge thus derived should be considered for incorporation of the standard.
  - (2) Technical Committee actions and supporting research materials shall be promptly transmitted to the Sponsoring Organizations. The Sponsoring Organizations shall have forty-five (45) days to review the materials and to submit their recommendations to the National Committee Secretary and to the Chair of their own delegation. An affirmative vote of two-thirds (2/3) of the Members of the Council determines the policy of the National Committee with respect to a motion made and seconded.
- (5) A Technical Committee Chair who is an Associate Member or Technical Member may, at meetings of the Council, make motions that the Council approve recommendations of the Technical Committee. However, such Technical Committee Chair shall not have the right to vote unless serving as the designated alternate to an absent Member.
- (6) The Federal Highway Administration solicits input on possible changes to the MUTCD via notices published in the Federal Register. On occasion, the date of publication of a Federal Register notice and the comment due date may not allow for the referendum procedure described in paragraphs (1), (2), (3) and (4) to be followed and completed by the comment due date. The publication date and comment due dates may not allow an opportunity for one or more of the following:
  - (a) Consideration by a Technical Committee at a meeting of the Technical Committee.
  - (b) Sponsoring Organization review and comment
  - (c) Floor discussion and a vote by the Council at a meeting of the Council.
  - (d) Other steps in the development of a recommendation.
 In these instances, the Referendum procedure described in paragraphs (1), (2), (3) and (4) should be followed to the fullest possible extent. In the event that the publication date and comment due date do not allow time for Sponsoring Organization review and comment, the Council, acting as representatives of the Sponsoring Organizations, shall vote based upon the recommendation of the appropriate Technical Committee(s) and all other pertinent information. The Sponsoring Organizations shall be notified of the Council's action. Mail ballots or electronic ballots may be used by Technical Committees and/or the Council.
