RWSTC RECOMMENDATION FOLLOWING SPONSOR COMMENTS

TECHNICAL COMMITTEE: NCUTCD Regulatory/Warning Signs Technical Committee

DATE OF ACTION: (Task Force) 5-6-12, revised 5-7-12, revised 12-9-12 following sponsor comments

TASK FORCE: Tom Heydel (chair), Fred Ranck, Jim Pline

RWSTC APPROVAL DATE: 1-9-13

COUNCIL APPROVAL DATE: 1-13-13

TOPIC: Statutory Speed limit definition

AFFECTED PORTIONS OF MUTCD: Section 2B.13 and 1A.13

DISCUSSION/QUESTION:

The MUTCD in Section 2B.13 paragraph 06 talks about maximum speed limits and applying them by State Law. It uses the term “Statutorily”. Section 1A.13 does contain a definition of statutory speed limit. A question was raised that we need to define statutory speed limit better.

Review of the definition in Section 1A.13 and in 2B.13 indicates that the only change needed is to add “State Law” in parenthesis in 1A.13.

RECOMMENDATION:

Modify definition of statutory speed limit to section 1A.13 definitions list.

RECOMMENDED WORDING:

Note: Proposed changes to the MUTCD are shown in underline red and removed text are shown in strikethrough red.
Section 1A.13 Definitions of Headings, Words, and Phrases in this Manual

214. Speed—speed is defined based on the following classifications:
   a. Average Speed—the summation of the instantaneous or spot-measured speeds at a specific location of vehicles divided by the number of vehicles observed.
   b. Design Speed—a selected speed used to determine the various geometric design features of a roadway.
   c. 85th-Percentile Speed—the speed at or below which 85 percent of the motor vehicles travel.
   d. Operating Speed—a speed at which a typical vehicle or the overall traffic operates. Operating speed might be defined with speed values such as the average, pace, or 85th-percentile speeds.
   e. Pace—the 10 mph speed range representing the speeds of the largest percentage of vehicles in the traffic stream.

215. Speed Limit—the maximum (or minimum) speed applicable to a section of highway as established by law or regulation.

216. Speed Limit Sign Beacon—a beacon used to supplement a SPEED LIMIT sign.

217. Speed Measurement Markings—a white transverse pavement marking placed on the roadway to assist the enforcement of speed regulations.

218. Speed Zone—a section of highway with a speed limit that is established by law or regulation, but which might be different from a legislatively specified statutory speed limit.

219. Splitter Island—a median island used to separate opposing directions of traffic entering and exiting a roundabout.

220. Station Crossing—a pathway grade crossing that is associated with a station platform.

221. Statutory Speed Limit—a speed limit established by legislative action (e.g., Federal or state law) that typically is applicable for a particular class of highways with specified design, functional, jurisdictional and/or location characteristics and that is not necessarily displayed on Speed Limit signs.

Section 2B.13 Speed Limit Sign (R2-1)

Standard:

01 Speed zones (other than statutory speed limits e.g., established by Federal or state law) shall only be established on the basis of an engineering study that has been performed in accordance with traffic engineering practices. The engineering study shall include an analysis of the current speed distribution of free-flowing vehicles.

02 The Speed Limit (R2-1) sign (see Figure 2B-3) shall display the limit established by law, ordinance, regulation, or as adopted by the authorized agency based on the engineering study. The speed limits displayed shall be in multiples of 5 mph.

Figure 2B-3 Speed Limit and Photo Enforcement Signs and Plaques
03 **Speed Limit** (R2-1) signs, indicating speed limits for which posting is required by law, shall be located at the points of change from one speed limit to another.

04 **At the downstream end** of the section to which a speed limit applies, a Speed Limit sign showing the next speed limit shall be installed. Additional Speed Limit signs shall be installed beyond major intersections and at other locations where it is necessary to remind road users of the speed limit that is applicable.

05 **Speed Limit signs indicating** the statutory speed limits shall be installed at entrances to the State and, where appropriate, at jurisdictional boundaries in urban areas.

Support:

06 In general, the maximum speed limits applicable to rural and urban roads are established:

   A. Statutorily – a maximum speed limit applicable to a particular class of road, such as freeways or city streets, that is established by State law; or
   B. As altered speed zones – based on engineering studies.

07 State statutory limits might restrict the maximum speed limit that can be established on a particular road, notwithstanding what an engineering study might indicate.

Option:

08 If a jurisdiction has a policy of installing Speed Limit signs in accordance with statutory requirements only on the streets that enter a city, neighborhood, or residential area to indicate the speed limit that is applicable to the entire city, neighborhood, or residential area unless otherwise posted, a CITYWIDE (R2-5aP), NEIGHBORHOOD (R2-5bP), or RESIDENTIAL (R2-5cP) plaque may be mounted above the Speed Limit sign and an UNLESS OTHERWISE POSTED (R2-5P) plaque may be mounted below the Speed Limit sign (see Figure 2B-3).
